

GRAVITY

TRAINING (PTY) LTD

COMPANY PROFILE

ABOUT GRAVITY

Gravity Training is a leading work at height safety solutions company in South Africa with an international footprint throughout Africa, Europe, the Middle East, India and Australia. Gravity Training offers a wide range of exceptional training courses, such as work at height and rigging training. Beyond these courses, Gravity Training also offers other services related to work at height, such as the development of fall protection plans and consultation services.

Gravity Training was first established in 1999 and is well known for being a specialist in the work at height and rigging industry. We are accredited by Services SETA, merSETA and IRATA.

OUR SERVICES

Our main focus is on industrial work at height and rigging courses. However, we believe that our biggest advantage lies in focusing on each client's specific needs. We do this by customising services to the client's relevant industry whilst always complying with the relevant accreditation authority's requirements.

INDUSTRIAL COURSES

Fall Arrest Courses

- Basic Fall Arrest Level 1 – 1 Day Course
- Fall Arrest and Basic Rescue Level 2 – 2 Day Course
- Advanced Fall Arrest Rescue Level 3 – 3 Day Course

Rigging Courses

- Basic Rigging Max 100 kg – 2 Day Course
- Mechanical Lifting Max 500 kg – 3 Day Course

Rope Access Courses

- Rope Access Level 1 – 5 Day Course
- Rope Access Level 2 – 6 Day Course
- Rope Access Level 3 – 6 Day Course

Specialist Courses

- Fall Protection Plan Development – 3 Day Course
- Implement a Fall Protection Plan – 1 Day Course
- Portable Ladder and Pole Climbing – 1 Day Course
- Tower Erector - 6 Day Course

Note: Each of these courses can have small variations depending on the client's geographical location, specific client requirements and other factors. Therefore, it is important to consult with any of our highly trained bookings personnel before making a booking.

KEY FOCUS AREAS

One of the key pillars to our success is the quality of our services and products. We continually strive to uphold and enhance the quality of all our services and products.

We support innovation within our industry and aspire to be forerunners in our field. We aim to be the first to make changes that advance the industry, and implement those changes to the best of our ability. Therefore, we are investing heavily into the digitisation of processes in order to reduce certificate lead times and enable verification of learner certificates on our on-line system. We are even incorporating virtual reality experiences into some of our training courses.

During the next five years, we aim to establish Gravity Learning Centers (GLCs) throughout Asia and Europe, whereby we partner with local training providers to ensure that quality training is done according to the GLC model.
